🪪 ABOUT ME

With training and experience as a Full Stack programmer. My preference is definitely the Front, I was always a design enthusiast and in this way I can enjoy what i like the most.

💼 EXPERIENCES

Front End, *TECHO* ↗

I worked on the Front End in one of the initiatives of the TECHO company. Adding, creating and developing components, visuals and styles as well as making use of technologies such as React, Redux, Typescript and libraries such as Material UI, Material Table and Formik

Individual project, *SoyHenry* ↗

I worked individually in a Pokémon-themed web application, implementing sorting methods, filtering, controlled forms, among other things. Using mainly React and Redux for the Front and Express and MySQL for the Back

Full-Stack Teaching Assistant Bootcamp, *SoyHenry* ↗

Coordinate a group of students to achieve integration to the study group.
Guide students in the first steps of the course.
Assist to solve exercises and promote group collaboration (Pair Programming).
Propose ideas to improve the Bootcamp processes.

Front End, *Private Client*

 I was hired by a photographer who wanted a website for his job. I was the only one in charge of the frontend. I worked on things like adding a background carousel, personal showable images, login and register components on the user side and for the admin side add a drop box, users grid using Javascript, React and Redux, making styles with pure CSS.

Front End, *Paradise15* ↗

For this project, I worked with the same coworkers from the private client. I also managed the frontend, but this time I was following the indications of a graphic designer. Like other times I was using Javascript, React and pure CSS.
